

Genetic Modification Exposed! - Why?

Revelation's fourth rider [pale or green horse] is GMO technology in our food

Genetic Modification Exposed! brings together in one unifying concept the primary reason why all nations and all the creation must go through an Apocalypse in the near future.

The reasons I propose are expressed from a two rail perspective according to an ancient 4,000-year old book - the Bible. This short booklet mirrors our modern behavior by aligning it with God's earth maintenance contract made with Adam and Noah, with particular care required when it comes to genetic laws of sustainable biological integrity.

In these pages, you will learn about what irritates God so severely that He must permit and consummate the coming Apocalypse, which is projected to last between the years 2008-2015. My approach relies heavily on Jesus saying that the future Apocalypse will be like the first one in the days of Noah, when humanity also violated God's genetic design of the creation.

For the coming of the Son of Man will be just like the days of Noah. For as in those days before the flood they were eating and drinking, marrying and giving in marriage, until the day that Noah entered the ark, and they did not understand until the flood came and took them all away; so will the coming of the Son of Man be. (Matthew 24:37-39)

Noticing identical appearance of 21 December solstice dates in both great trials of humanity surprised me greatly. **Genetic Modification Exposed!** answers the question, "Why" there will be an Apocalypse. It started out as a letter sent to the Board of Supervisors in Mendocino County, California in November 2006. This same letter was later picked up in slightly edited form by the **Anderson Valley Advertiser** newspaper published in Mendocino, California. Since we read about genetic modification in Genesis, the book of Jashar and the book of Enoch, this ancient violation of one of God's principle laws is well documented by eyewitnesses who live in the Atlantis civilization before 21 December 2288 BC.

I collected six months of scientific magazine articles full of data appearing nationwide until May 2007. I next measured the destructive progress of genetically modified abuse of our environment and food supply to let you now how late it is on God's clock. He cannot wait much longer to end mankind's insane pollution and destruction of the environment. I was shocked to say the least. New developments in the GMO Frankenstein world will usher in the Apocalypse as the necessary means to save the families of humanity from extinction. The irreversible process of species extinction by disappearance or genetic technological transformation in the animal-vegetable kingdom has already started. It would soon thereafter be followed by the end of all human life on earth, if God did not intervene as promised in the Bible.

If God does not interfere and stop the prophesied pale green rider, this advanced and uncontrollable technology will cause the destruction of all life on earth. As it is, the Apocalypse will result in the destruction of 1/3 of global population due to genetically modified foods in one way or another. But God will graciously save some of humanity even as we subject each other to cruel injustice and wrongful death and suffering from war and religious oppression.

One honest scientist stood before a congressional committee in Washington, DC some time in March 2007 to warn those Senators about the potential horrors to come. These same warnings match the biblical prophecy picture presented in these four Babushka books, and it is supported with a lot of scientific and Biblical information.

You be the judge! Become informed about GMOs! Read Genetic Modification Exposed!
