

Non-rotating Generation of “Free Electricity”

A.) History of a free Kosmos Energy suppressed in Universities

The Torah-Bible is the oldest book on earth and has embedded a lot of science globally censored around the world by corrupted governments. They are bribed with huge grants from psychopathic Illuminati NYC bankers printing money from thin air. But looking up in the night sky will observe that free Kosmos energy in the universe is still around seeing the lights ON in galaxies now better visualized with a telescope. A 4000-year-old bible story tells of Abraham who got a promise from the creator to look up in the night sky and count the stars. The Lord appointed him for a special covenant blessing to become a tiny nation Israel with a unique job to employ future scribes to report and record human history. How did “good and evil” affect everybody since Adam and Eve from the Garden of Eden? Everybody knows that story will have no problem understanding free energy for mankind.

To investigate forbidden science, you must learn to read so you can find out what it says in the first verse in the Torah Genesis. It begins with “infinite light” on the first day of creation coming from a Kosmos source. Why is it suppressed in our civilization that once more became totally evil again like Sodom and Gomorrah obeying psychopath NYC bankers and government bureaucrats denying (7) seven billion people free energy? Is it because we have become timid ignorant slaves obeying the world bankers and accepting a worthless currency for our labors destroying worldwide every culture. Thus they planned to eliminate a Christian religion exposing truth by creating conflicts among nations intended to wipeout all Life on this planet the only place in the universe. Many YouTube videos revealed the reason being totally evil, now worse worshipping Lucifer in secret government places.

Infinite light energy slowed down by the Time Dimension is not allowed in schoolbooks and has been suppressed since 1913 when the US Congress allowed NYC bankers to print fiat money. For over a hundred years, the bankers controlled what science would be allowed internationally. To organize a New World Order, they believed that anyone who controls energy would worldwide dominate every military hi-tech corporations of nation thus favored Coal and Oil. For diversion invented science fairy tales to conceal truth, invested billions in CERN smashing atom intelligence now Fusion lies to reward compliant PhDs to keep the masses uneducated confused easier to control. Thus the Bible revealing truth must be forbidden.

They confiscated 700 patents of Nicola Tesla who discovered free electricity and forbidden a discovery by a German schoolteacher Hoffman who split water H_2O into Hydrogen gas the cleanest nonpolluting fuel for your car, not allowed. But in remote Peruvian mountains, a German DW news reporter made a video of three colorful dressed women laughing said; “We all piss in one pot as water is not around extracting Hydrogen fuel to cook our meal for our families.” That is not allowed in a modern civilization.

But hundreds rebellious truck drivers and many teenagers share a common ground not being paid-off with money like government bureaucrats accordingly use water driving around in secrete not telling a corrupted authority in charge. This already caused the oil-coal stocks to fall below 50%? Hundreds of YouTube videos show now how electricity is produced re-inventing what Tesla discovered, but they do not really understand the underlining physics how infinite light energy from space can be collected on a lower entropy level useful for everyone; like the woman in Peru better educated in science not biased by lies and deception taught in every schools. Your ignorance of true science is proven when you pay over \$200 US dollars every month to the criminal Oil-Coal cartel.

Why not use your rights guaranteed by the US Constitution and make some noise to remove the fossilized corrupted Senators appointing dictator-presidents to keep free Energy outlawed. They do not care that the environment is destroyed with lies and deception ending now all Life causing massive extinction on earth. Why still forbid a free Kosmos Energy to benefit an expanding world population?

B.) Free Electricity Produced by a Transformer

The theory to generate free electricity is that *magnetism* must be perpetually moved, either rotating in a generator-motor or transformer. Explained in physics, when *Magnetism* is passing copper windings with an iron core or by permanent Neodymium-Iron-Boron magnets will produce free electricity. Like when we use a microwave oven-transformer and add a magnet on each side will increase electricity when more magnetism is moved in copper winding which was demonstrated by a young student video without knowing why?

<https://www.youtube.com/watch?v=7wf17CMIAbw>

He used an appliance food mixer motor to crank-start a network embedded frequency of 60 Hz connected to a multiple outlet plug. But the additional electricity came from embedded Neodymium-Boron magnetism, which were created from infinite Kosmos energy that crystallized into Fraunhofer elements on a lower entropy level not yet understood by atheistic scientists. Thus, electricity is stored in a battery or capacitor but also reproduced by a standard generator rotating magnetism or in a microwave-transformer not moving. In any case if it has copper windings must be ∞ looped together as the nature of electricity must flow or be pulsed in the next windings and when returned back will increase again a pulse frequency getting larger passed once more will get bigger. It will drive anything with free energy extracted from distinct atoms my grandkid knows has invisible embedded energy.

In the video above only one 110 volt primary winding is used which starts a 60 Hz blender motor. The electricity is flowing through the motor back to the transformer thus is amplified by extra magnetism of two strong magnets on the side adding stored energy. But if two appliance motors is used would not work which needs more amplification either more magnets or increasing internal magnetism described in Dummies Lesson #1 (Part 1). To generate a higher electrical current using a transformer or to speed up a generator need to accelerate magnetism with extra magnets flowing from North to South Pole. It will guide extra magnetism through the iron leg hole windings consequently will increase electricity in the output coil.

To produce more electricity we need to either add more magnets to the transformer or internally amplify a bigger flow by using a second coil winding. But notice electricity is increased by a discharging capacitor between the next winding, or if we use two (2) Transformers together must have a capacitor in the middle to amplify magnetism in the next windings similar to two motors, all will generate extra electricity. Thus, many YouTube videos confirm physics to better understand how magnetism pulsed through a wire loop and discharged by capacitor will create added free energy = electricity.

<https://www.youtube.com/watch?v=J20gLQJPTjw>

Perpetual motion can be simulated with two motors generating free electricity, or like two microwave oven transformers placed side by side. When both primary loop 110 Volt is together becomes the output side. Now wire the same secondary 2000 Volt coil together but should attach one leg in the middle of a suitable ceramic non-electrolyte capacitor matching the load to the output terminal. Polarity is important like the motor video showed.

Again when two transformers coils are connected with the same secondary windings combined with one capacitor in the middle will amplify electricity just like the motor video above. Basically the first set of windings charges the capacitor of an alternating polarity being discharged in the next windings that will increase the pulse power flow producing more magnetism initialized by a crank frequency of a 60 Hz motor. Whatever the crank frequency is, will be reproduced but in higher power = watts. When two transformers are used must reverse back to 110 Volt to fit your house systems. Pick the right size for your house or car.

Just Google *free energy-transformer* to have fun and widen knowledge horizons, or read **Babushka Egg #9** sent to President Obama still obeying NYC Psychopath bankers, thus he missed being the most famous person in history by not allowing “free energy” for 7 billion people.
