

## **CUBIC CHESS GAME – Eight Boards**

### **General overview**

A chess game is the oldest war competition without shedding blood pitting a mind against intelligence. It has not been systemized even by world computers with artificial intelligence not yet been able to win. But soon that perspective may change. However mankind was created by ELOHIM –***Let us make man in our image*** (Genesis 1:26) thus could one notch higher challenge a world-computer humans created expanding it to a three dimensional domain like physics is mirror-image in the metaphysic still forbidden in every university teaching deception and lies. Anyway for the experts if you want a higher challenge and become a millionaire selling a global CD's useful on the Internet, can play the chess game on a three dimensional level like our universe is based on. It cannot go any higher as it gets close what the forbidden Torah-Bible proclaimed soon to be restored in the global town square.

1. The Cubic-chess-game is a three dimensional computerized graphic board with images of fandom outlined 512 shadow sub cubes projection.
2. Thus the multi layers chess-cube has 8 layers duplicated in a layout  $8 \times 8 = 512$  see through shaded outlined cubes.
3. The chess figures are changed by verbal voice command to move a figure to a predetermined miniature fandom cube up or down, or level forward according to the standard rules just like a normal horizontal chess board.
4. The players are interconnected by with two options. One is two flat TV panels linked to the Web, or the other each player is looking into the same large TV screen at home to interact and play the game.
5. Thus each player manipulates a control device to turn the image on each axis to look sideways, or any position; but before a final move is made is put to rest in a standard perspective projection.
6. The white party is on top and opposite on the bottom is black. Perhaps in the middle of the cube will simulate modern warfare Air and under Water, I am not an expert.
7. All the same conventional rules apply for each chess figure but can be moved to each (8) eight boards to expand a mind horizon for total war.
8. Check the other free Dummies inventions to have fun perhaps become a millionaire, but hurry as this civilization was destined to end soon prophesied the Torah-Bible.
