

# Can the Dates for the Apocalypse and Possible Destruction of New York be Trusted?

21 December 2008 – 21 December 2015

## Pearl #143 –

**Sometimes in your books and on your web site you mention 5 February 2009 as the projected date for the destruction of New York City and sometimes 9 February 2009, 9 February 2012 or 5 February 2015. Why the discrepancy?**

By Herbert R. Stollorz  
4-14-2008

How is it possible to date future events if one is not a prophet? Conviction about such matters upsets both theologians and scientists, yet it is the combination of the two that holds the answer to this vital question.

Scientists speculate and postulate bombastic theories of uncertain veracity, but in the end, all scientific theories must conform to physical reality. For example, too many scientists believe in the theory of evolution, which runs contrary to the Second Law of Thermodynamics.

The same test should apply to theologian speculations and dogmas to separate truth from pompous preaching. Too many Christians believe in a premillennial rapture theory, which is inconsistent with Scripture and God's Plan for Humanity. Both disciplines suffer from a philosophical pride that exalts the expert and abusively suppresses alternate or minority held opinions.

I felt the need to combine both science and theology in order to present a balanced construct of reality from a dual railroad perspective. That gives a 360° perspective similar to standing in the middle of a theater-in-the-round where one can see things not obvious to a forward only projection of sight. Turning around to see the other side makes life more interesting. My "360° movie" unfolding in my "Babushka books" is based on history and science together, which makes a lot more sense than what school books written by monorail scientists or monorail theologians contain.

Science too often leaves God out of the picture, yet he is the Creator or all and not some old gentlemen coming around at Christmas time. Faith in Jesus and the Bible is publicly mocked. God has been removed from our consciousness today as Hitler removed the Bible from German culture 75 years ago, which contributed to the deaths of over 20 million people.

Since the end of World War II, the United States cannot boast moral superiority over Hitler even on this statistic. More deaths may be totaled from the millions of aborted babies and the deaths resulting from our many wars for the obscene profit of some individuals. If that is not enough, then add in the deaths caused by American companies selling military hardware to anyone - even the terrorists our corrupt government claims to fight.

God's answer to humanity's willful avoidance of truth will be a 7-year Apocalypse. His patience has run out. Soon he will push the button to prophesied events embedded in ancient bronze-gold clocks, like the 32-gear Antikythera Mechanism dated to about 100 BC that was fished out of the ocean. This and other ancient calendar

clocks have perplexed scientists for decades, but they now cannot plead ignorance to excuse a lack of faith.

The dark hour of midnight has arrived according to God's calendar<sup>1</sup> embedded in Genesis and many clocks exhibited in museums now deciphered. The Creator is a fantastic designer who built his blueprint Plan for Humanity into the structure of time, history and natural physical science. He is greatly irritated by humanity's messing with his creation with the unnatural, greed-driven genetic modification of plants and animals used for food and medicine.

## The Scientific Method of Prophecy

Dating prophetic events became an exact science for me requiring a measure of interpretation across historic calendars from cultures around the world. In antiquity, the years were not 365 days for one solstice cycle because of an asteroid caused earth wobble scientists did not recognize due to their evolutionary biases.

When I started out, I used Hebrew overlays which inevitably provided only partial understood for me as a Gentile. Nothing like it existed in the university libraries. As I progressed, seeming data conflicts balanced out to a simple, consistent picture. As I learned more about ancient calendars, the picture of the past corrected itself in time. My research system improved so that since then, I have not found too many errors.

The Temple in Jerusalem traditionally provided a geographical link between the spiritual and material dimensions of the universe. Jerusalem's historical stone temples also provided potent teaching analogies regarding God's Plan for Humanity; therefore, events prophesied to take place regarding the people of Israel and the Temple are redundantly positioned in the chronological gears of history and prophecy. Most events prophesied for other nations are mentioned only once and commonly with brevity, which makes coming up with multiple witnesses to verify dates more difficult.

As you will read repeatedly, I require two to three witnesses even used in our legal system to establish a matter and need five witnesses to be dogmatic about biblical teaching to prove to theologians that their religious opinion do not match facts. I make this requirement of myself as well as others. Frankly, I have two witnesses [+one] for each of the dates above, and I have a witness that places the destruction of New York City as the "Babylon" merchant capital of the world in Revelation 18 would be ending on both **9 February 2009** and **5 February 2015**. Read on to learn how I resolve this issue.

## Vital Characteristics of Prophetic Chronology

1. Our Time dimension is not constant but is curved and slowing down as witnessed by science now discovered speed of light is slowing.
2. Hebrew, Aztec and other ancient cultures built their calendars on observable changes in the skies including those of the sun, moon, planets

---

## Can the Dates for the Apocalypse and Possible Destruction of New York be Trusted?

21 December 2008 – 21 December 2015

and stars. A year was not based on an exact count of days (Aztec 260, Hebrew-Chinese 360 or Gregorian 365) but the completion (or turning, Hebrew *shannah*) of a solar solstice-equinox-solstice-equinox cycle and/or a lunar cycle of 12-13 months. (Genesis 1:14)

Counting thousands of years would make any projection faulty unless the difference is computed with modern calculators. Accurate knowledge of ancient calendars is absolute essential as they are witnesses from history. One problem is the evolutionary bias of most scientists based on atheistic theories not proven, which also tends to distort facts.

3. Due to the variables found in ancient chronological-calendar-clock systems, my methodology converts all dates to the astronomical, atomic clock system used by NASA. Only then can the events of history and prophecy, which occur at intersects of time cycles in aligned patterns, be properly calibrated and placed within our modern framework of time.
4. The Hebrew Alphabet Number System (HANS) provides an interpretive template required to analyze the significance of various alignments /overlays and intersections of time cycles (or gears) in the fulfillment of, or progress in, God's Plan for Humanity.
5. Finally, the Bible provides some "big picture" guidance on what to expect at each stage of God's Plan for Humanity. Much of that plan has already come to pass as human history and some of it is yet to take place - prophecy. For example, in Matthew 24:37 Jesus taught that the last days of this present age leading up to the Apocalypse would be "like Noah's day." Fulfilled prophecy and bible history help us understand the nature of prophetic messages with their multiple types or fulfillments. Applying the above four characteristics makes it possible to project prophetic expectations greater detail in regards to both the timing and description of what will happen, when and involving whom in the future.

### Brief Discussion of the Above

Now let's have a look at the Infinite Time chart, which attempts to define "time" a little differently from what you may have ever seen before. I constructed it this way to analyze what the mystery clocks and calendars were measuring. This chart provides important context to the spin-axis hypothesis.

I use the expression "time" in comparison with the 7,000-year history cycles of humanity. I had noticed that the monthly progression of cycles or years of ancient calendars behave as if they possess **relative values compared** to the absolute and **fixed system of the modern Gregorian calendar**. This observation is very important as it demonstrates the possibility for a different monthly count within a year of the earth's orbit of the sun during the ages of earliest human history before the BC period as recorded, for example, by the Roman 10-month calendar corrected by Julius Caesar.

The Bible states that Jesus appeared at the fullness of time; therefore Gregorian calendar timelines flow from either side of his birth, which is where the BC/AD line is drawn. Jesus' birth is the apex of human existence from a Christian biblical perspective. Scientifically, inserted the heavenly, Heh, dimension within the fleshly body of Jesus in order to dynamically restore God's undiluted presence on earth, which had been missing since the Garden of Eden. This is why Paul referred to Jesus as the Second Adam. (1Corinthians 15:47)

The chart itself displays a set of logarithmic parabolic curves. It begins at an infinite left side and curves to an infinite future on the right. The apex of the parabola touches a horizontal line at BC/AD. Afterwards, two options open up. One may travel into infinite along the line of Eternal Life into the *Jod* Dimension, or one can travel the downward curve to the White Throne Judgment ending material time and space that the Hebrew Alphabet Number System (HANS) identifies as the *Daleth* Dimension, which end is symbolized with *Taw*, the last letter of the Hebrew alphabet.

As a clockmaker, I attempted to straighten out this exponential curve along a horizontal line to better depict the passage of human history from the BC to AD perspective. Any attempt to reinterpret a curved structure using linear language and models, such as our everyday concepts of time, runs into problems and potential inaccuracies or errors. Thus, my method of projecting Bible prophecy attempts to linearly describe the cyclically curved structure of forward and past time and space. Small deviations can result in scaled misplacement of an event in its proper chronological context, which is one potential source of error in my research into dating the future events prophesied by the Bible. The harmonic alignment of calendar-clock cycles also explains the phenomenon of prophetic fore types and historical echoes for key biblical themes.

Finally, note the special crossover point in time measures or divides our calendar with Jesus Christ. He is the fulcrum of our existence connecting us with the past infinite time to an infinite future time. If you are interested in "God's plan for humanity" from another perspective never preached in church or just curious about a new Biblical Rosetta Stone discovery, check out

21 December 2008 – 21 December 2015

my book, **Asteroid Answers to Ancient Calendar Mysteries** on the Internet to read or download.

## Different Lengths of Years

Another difficulty arises from the fact that the numerical relationships between the cycles as described by the Hebrew Alphabet Number System (HANS) treat all observed year sequences of solstice-equinox-solstice-equinox as if they were the same length in solar days, which they are not. In the patterned cycles of history and prophecy, ancient "short" years may be paralleled by today's "normal" or solar years as measured by one complete earth's orbit around the sun.

In other words, 1,000 "years" of time passing before the Flood carries equal interpretive weight in HANS as does 1,000 of today's years, although the pre-Flood years were seven times shorter than our years because the earth had a different spin axis wobble which is now fixed at  $23\frac{1}{2}^\circ$ .

That is why Methuselah is only 138 modern calendar years old, which is equal to the Bible's 969 52-day-cycles, or "years" as measured from solstice to solstice as observed from earth when it spun on three axes instead of today's two axes. It still took about 365 daily rotations for the earth to travel around the sun once in both systems, but what the ancients saw and counted was different from what can be observed today.

This concept could boggle your mind for a bit, but the issue is really one of perspective. To the ancients who lived in a comparatively simple paradise on earth, what mattered was the pattern of planting, growing and harvest seasons. There is no magical importance to one's "year" cycles being 365 days or like the Aztec counting 52 days cycles because at that time the earth had a different axis spin. The key factors related to a culture's shared experience translated into a perception of marking time's passage in order to align their calendar system with the "signs in the skies." Once this was accomplished, the ancients were able to mark the passage of time by the movements and conjunctions of the sun, moon, planets and stars, which made it possible to project and plan when to plant and harvest agriculturally significant crops. Most cultures marked the agricultural cycles by religious festivals.

My research consistently employs the calibration of various ancient calendars and histories with our modern secular-Gregorian NASA calendar. Having now in our time a consistent length of year and convert that to historical reference points commonly used in ancient times becomes important when one attempts to relate material evidence of artifacts and architectural remains from history-archaeology with the future history or prophetic events described in the Bible and/or other ancient history books. It also becomes important when one wants to correlate the histories of different cultures because they used different calendar-clock systems, and I have been constantly amazed by how cultures separated by time and geography aligned with the Bible's story of mankind and the future for all nations predicted in the Bible.

## Application to Dating the Destruction of New York City

New York City historically represents the modern resurrection of an economic and financial octopus that reaches into every aspect. It is a contemporary renaissance of ancient Babylon in many ways – so much so that I believe its destruction is described in Revelation 18. Timing the date of New York City's destruction with certainty remains a challenge not entirely satisfied.

The Bible describes that a world power seaport, the city with the greatest harbor on earth, will be destroyed in one hour. Technically, such destruction is only possible with nuclear bombs. The following represents my latest thinking on the matter.

**First, my recommendation is for those living in and around New York City to take a vacation in early February 2009. That way, you escape the devastation if I am correct, and no one is personally out too much financially if I am wrong.**

My books have demonstrated in detail how the major Apocalypse cycles connect with Jewish holidays and fast days with a lot of mathematical proof coincidences too great not to pay attention. For instance, using the Antikythera and Aztec clock constant of 14.305789 multiplied by Daniel's weeks we get Temple destructing dated to the day within hours. That measuring forwards and backwards by itself shows clearly that the cycles of God's Plan for Humanity were set in by a divine Designer.

Because of those "clock gear coincidences," I believe that the other or minor special days in the Jewish faith possess special meanings too as they may have too embedded a calendar position applicable for New Year for Trees, **TU (15th) B'Shevat**, which is followed by the better known, next Jewish holiday of **Purim**. Purim is the annual celebration of the events recorded in the book of Esther where the Jewish were saved from a worldwide destruction in ancient Persia or Iran.

These holiday cycles connect together like Daleth-Heh system and seem to fit exactly to a day with the Beast system mentioned in Daniel's vision of a cut down tree [Daleth] that symbolized the Beast system featured in Revelation [Heh]. So I focused on these days with a closer look hoping to discover dating parallels we should consider in regards to dating the destruction of New York City.

If you follow my advice and get out of town in time, then you will celebrate Purim 30 days later with the Jewish people. It overlays with a witness date embedded in Genesis 7 that mentions the breaking up of the fountains of the deep (great earthquakes) and massive downpours of rain on the 17<sup>th</sup> day of the second month. That's when "all hell broke loose" in Noah's day. The downpour prophesied even by the Aztec would be nuclear fire from the sky as the terrorist will probably use the highest skyscraper floor to maximize the damage.

The Apocalypse in Noah's day started on a solstice, 21 December 2288 BC. Since Jesus said in Matthew 24:37 that the prophesied Apocalypse will be like Noah's day, it also starts on a solstice – 21 December 2008. That date is confirmed by too many mathematical coincidences. Just putting two and two together would give good reason that hell will again break loose as counted 47 days from that solstice day, which comes to 9 February 2009 a Jewish holiday. However this time, the deluge will be a nuclear fire storm prophesied in the Bible and mentioned in the Aztec calendar, too. Check it out by

## **Can the Dates for the Apocalypse and Possible Destruction of New York be Trusted?**

**21 December 2008 – 21 December 2015**

reading **Asteroid Answers to Ancient Calendar Mysteries** and the continuing research in the **Bible Pearls** free to read on the Internet.

When counting from 21 December 2008, the same 47 days following a solstice, we come to a Jewish tree holiday, TU B'Shevat, as the next event. It could represent and connect with the far vision prophesied the biggest tree of Nebuchadnezzar's third dream [Daniel 4] to be cut down, which represents the end of the Beast system. The Beast system is further explained in Daniel's interpretation of previous dreams, which could align with a collapsing New York, followed by a regrouping of political power and money in Europe using a different world currency under an emerging savior-technocrat known commonly as Antichrist.

In the six hundredth year of Noah's life, in the second month, on the seventeenth day of the month, on that day all the fountains of the great deep burst forth (Genesis 17:11).

So my projected date fits 47 days [one month+17 days] from a solstice date, an astronomical event beyond human manipulation. As the calendar turns, it hits a target – TU B'Shevat, the Jewish tree holiday, but it is still only one witness. Let's count backwards in time from 9 February to 9 January 2009 [one month] plus 8 January to 21 December 2008, midnight [17 days].

**9 February 2009**  
**15 Shevat 5769**

### **Watch New York**

The Jewish moon cycle calendar must be calibrated to the Georgian corrected world NASA calendar. You be the judge and connect it with the only date possible 15 [TU] B'Shevat which also exactly matches the Genesis projection of 2009 to start the Apocalypse. If you need more proof, we must further isolate events of prophecy in accordance with the rule of prophecy lenses that project both near and far visions in time fulfillments. Events relating to a possible date matching New York's destruction need additional information or witnesses at this moment.

The 15<sup>th</sup> of Shevat 5775 correlates to our NASA calendar 5 February 2015 is another very significant date linked to the start of the Flood on 5 February 2287BC, but we must look for a much deeper interpretation coinciding to an exact day in my world prophetic clock.

In ancient times an asteroid ended Noah's Atlantis civilization leaving an earth wobble that altered ancient calendars on 5 February 2287 BC. In playing back the planetary sky of the Aztec-Gregorian calendar, I found that it matches in the far vision Bible lens with the final days of the Earth Beast system in Revelation correlating with 5 February AD 2015.

If we link this calendar alignment with the tree cut down in Daniel's vision to destroy our present civilization, we identify a potential description of a staged destruction beginning with 15 Shevat 5769 [9 February 2009] and ending on 15 Shevat 5775 [5 February 2015] leaving only with a tree stump remaining but chained with iron chains. The capitalistic money system now controlled by evil bankers will end at that date and never be allowed to

grow again to branch out to enslave mankind and pay for wars around the globe.

Read the science magazines Popular Science 2007 telling us that another asteroid is already in an 825-day orbit projected by scientists to plunge into our earth in 2020. But it will arrive sooner as a Russian scientist discovered another influence now matching our calendar projections to a day.

Checking out this information thoroughly takes too much time. So if I lived in New York, I would not waste time on a 50 – 50 chance to save my family and property. I would at least take a vacation the week of 5-12 February 2009.

Besides that, I strongly advise everyone to get prepared and make provisions for the tough times ahead. I learned some hard lessons as a kid who survived the collapse of Nazi Germany. Make provision to survive the massive starvation that will come about when no food is available. The genetically modified food system will collapse exposing deadly bacteria like E-coli. The GMO converted food has killed the immune system embedded in the cell since creation. You can read more about it in my short book, **Genetic Modification Exposed!**

Get educated in basic survival living if you want to survive the Apocalypse. Get your life right with the God of the Bible now if you desire to live into the promised glorious age of peace, joy, liberty with justice and true science for all peoples the world over.

**21 December 2008 - 21 December 2015**
