

## Why is the 21<sup>st</sup> Century Civilization so Confused?

Watching a number of new science discoveries on YouTube, I realized that our modern society has gotten a free gift with tremendous potential. Many enthusiastic young people now have the freedom to experiment with some laws of physics replacing corrupted university teaching methods suppressed for hundreds of years.

<http://www.youtube.com/watch?v=lf9yzHwOeUc>

Many YouTube science videos demonstrate and verify impossible ideas. They are like a genie released from the bottle that can never be put back. That free spirit has consequently exposed unscientific evolution lies taught for hundreds of years in our institutions. It has also forecasted the total collapse and bankruptcy of our outmoded education system. It will soon be replaced to lead us toward a new and better, divinely supported civilization - guaranteed!

Just to mention one far-reaching example, one short video ended with some experts explaining how the mathematics that has proven itself so useful to industry **cannot be proven**. That statement is like a bomb exploding in our face. It is now postulated with a new logic in total opposition, like a paradox to what has been accepted for hundreds of years.

Our civilization used the "old" math system to build higher skyscrapers, go to the moon, and fly regularly in space. While it was used to open DNA and changed the genetics of our food with predictably disastrous consequences, it can also be used to make totally free energy available to most of the world's populations, though still denied by the Oil Cartel and Military Complex. These advances in science have all happened in the last 50 years creating massive, upsetting political confusion.

Surprisingly, the Babushka egg concept books found on this website will shine through like a small light penetrating scientific darkness in the midst of this present civilization's dilemma. They explain the forbidden metaphysics useful in defining the nature of physics in a full circle. Physics can only be explained on a horizontal level, but even Dr. Einstein felt there must be another dimension, which is now explained in Babushka eggs, but from a vertical perspective with "infinite" on top, recorded in Genesis chapter one. As put forward, the existence of the ELOHIM has no beginning and no end, which represents a different concept explained as metaphysics linked by paraphysics.

New concepts and ideas - technology - now appear on the Internet to make us wiser, fulfilling Daniel's prophecy. Science will be one notch higher if cross-referenced with metaphysics to discover the underpinning physics and to reveal how and why new science innovations work. Examining novel concepts from two perspectives is a better balanced system like a dual railroad track, especially if it harmonizes with biblical Revelation. Together, they will validate concealed ancient truth, which can then be trusted with an open Mind. Ultimately, cross-referencing modern high technology with the divine Plan for Mankind will lead to discovering the purpose of God's creation. This all makes good sense, but why it is ignored?

Babushka concept eggs link science to metaphysics - defining the free gift of Eternal Life. Accepting that gift is the most important event of mortal life, which is not an invented religion. These concepts can be proven by investigating some Bible-science lessons as applied to modern life and compared to recorded history. You do not have to be highly educated to understand why our civilization is sinking like the Titanic.

Comparing events from the past will make it obvious that politicized global governments should embrace lessons learned from the history of the United States. The US history tells a story of an unusual attractive advantage derived from the 200-year old American Christian Constitution. Why it is now politicized, denied and censored? The last US Supreme Court session became prejudiced corrupted and destructive by twisting the fundamental constitutional laws upside-down. They promised to protect, yet they decreed mandatory adoption of atheistic relativism causing a society to degenerate. It has obsoleted a blessed, abundant American way of life for millions that was previously the envy of the world.

Contrast the American story with the example of collapsing Islamic societies that enforce an obsolete, Middle Ages culture ending in total destruction as witnessed even on controlled TV media. Check out the consequences of rejecting a Christian-based ethics embedded in Western Civilization. Watch TV and witness many burning countries embroiled in an Islamic Spring surrounding ISRAEL, which is like an island of normal life. Why are they prosperous, growing everywhere you look? When they applied covenant principles based on the Torah - like the American Christian Constitution, developed into the greatest science power block. They export hi-tech knowledge and food for the betterment of mankind.

On the other hand, check why nearly every other nation is experiencing uncontrolled turmoil, racing toward a scary, prophesied apocalypse, now better defined with science. Think and apply logic.

The answers for the energy and food shortages challenging our civilization and how to fix their causes have been recorded in the historic, 6000-year-old Bible. It gives us free advice linked to proven ancient wisdom demonstrated by real people who had the same problem, why is it suppressed by corrupt atheistic governments? Lucky for mankind, it has been reborn on the Internet, proving once again that nothing is new under heaven.

The confusion of new discoveries found on the many YouTube videos can leave one perplexed, but we should no longer accept being brainwashed with evolution lies. Erroneous scientific thinking and its consequences can be avoided if linked to the mirror image of the metaphysics denied in our universities. Reading about unique Babushka Egg concepts suppressed by the establishment can lead to the next higher level of widening knowledge horizons and expanding vision to 360 degrees. It was fun for me to see a worldview one notch higher, and that ended my confusion with a better understanding the paradox of life.

Babushka concept eggs are free on the Internet not profit oriented but will confirm fundamental physics creating a universe governed by a *Heh*-dimension ("other side") crystallizing a *Daleth* dimension of energy and mass controlled by the time-dimension measured by Fraunhofer spectral lines or defined by Dr. Einstein. They end with the purpose for mankind on a tiny planet, well balanced, as the only place where Life can exist. The biggest eggs revealed a mystery why bible narration is running opposite a cuckoo clock calendar writing history in advance known as prophecy to prove "Truth" to be acceptable to the skeptic. But mankind history can only be evaluated looking back showing conflict, for an example like unscientific evolution lies ending in corruption benefiting only bureaucrats voting for political correct promises you can check it out.

As a retired scientist, I got hooked and kept diving in the Bible Ocean searching for more precious Pearls of extraordinary breakthrough discoveries that unlocked many answers to the global dilemmas of our time. It resulted in collecting many science facts matching the Bible and revealed a new atom theory to me, though ignored by the atheistic establishment.

That could explain why Global Warming is not matching statistics, though it does increase the salary of UN bureaucrats. These books exposed how deadly GMOs is causing extinction ending life on this planet. The consequence is suppressed from the public, but generates patent fees enforced by a corrupted FDA, same sex married to a powerful, world octopus Monsanto cartel. Now forgotten, they were the inventor of Agent Orange that poisoned millions in Vietnam married to the military complex. That totally evil cartel will affect the future of every human being on this earth as usually killed millions ever since hidden under multiple sister corporations like an octopus nothing can escape.

It gets worse. They are now more corrupt, having genetically screwed up every food seed worldwide, outside international law, by paying off Supreme Court judges and senators. This forbidden discovery trail investigating science cross-referenced with the banned ancient bible exposed free energy, suppressed for over 80 years. It could get you killed or silenced like so many testifying scientists on the Web.

Summing up the other side of the new math energy equation, the forgotten ELOHIM is now fine-tuning his creation. How he is doing that? Now collected in the 12 Babushka egg books, but the source of eternal Life is only revealed in one Torah-book written by the ELOHIM. Shortly, we will witness the end of all "Evil" in the Kosmos and on earth, as Satan will be the only survivor, sealed in the underworld prevented to plague mankind. Afterwards the returned Jesus Christ will start for the first time a new divinely controlled civilization to last 1000 years without war.

I no longer worry we may have run out of time ignoring my scaled book-eggs even dating God's Wrath. It is too scary when someone predicts your death against the odds in about two years not surviving the prophesied asteroid apocalypse. The date upsetting theologians is written in the zodiac constellation sky using science now witnessed in many YouTube videos proving a court case of the coming 5-month Apocalypse. But if you want to survive or be better educated, just read my last Jonah Warning and watch the sky. (Pearl #249) One way or another, it will end and start a new equation. Read some of the other Pearls to better understand the forbidden metaphysics on a vertical spiritual level:

***God's Wrath ← 17 September 2015***

***22 September 2017 → New Life***
